Tide gauges (n = 51)
Rivers (n = 256)
Urban creeks (Houston) (n = 71)
RMSE (cm), median station
Lead time (h)
Lead time (h)
Lead time (h)
Water level only
Water level + wind
Water level + wind + discharge (no rainfall)
6 h-change scaling, gap filling (no rainfall)
Scaling, gap filling + HRRR rainfall, trained with missing hours, mean of 5 models
6 h-change scaling, gap filling + observed rainfall (upper bound, not real time)
